Summary

I am a full-stack developer with a passion for user experience (web and mobile) and interaction design. If you are looking for a front-end / full-stack developer, who is confident in self-management and has a wonderful work ethic, you are in the right place. Learning and growing as a developer is important to me and I will put all my knowledge into your project. I am currently working on a project as a front-end developer. I am excellent at working in teams and enjoy collaboration with peers.

I am also a mental health worker who is focused on the provision of mental health support, first aid, and counsel to youths, families, and persons going through grievance, depression, as well as anxiety through electronic devices and feedback.
